ANTI-SPAM POLICY

Know What Is Spam.

In the context of electronic messaging, spam refers to unsolicited, bulk or
Indiscriminate messages, typically sent for a commercial purpose or malicious
reasons.
Inclusivecryptos.com has a zero-tolerance and strict adherence towards spam policy.

An Effective Automated spam filtering technique.

Inclusivecryptos.com's advanced and improved messaging systems automatically
scan all
incoming emails and other messages, and filter-out messages that appear to be
spam in relation to our set up guide of rules and regulations.

Various Problems with spam filtering

No message filtering system is 100% accurate, and from time to time legitimate
messages will be filtered-out by Inclusivecryptos.com's systems.
If you believe this has happened to a message you have sent, please advise the
message recipient by another means and let him know the correctness of it.
You can reduce the risk of a message being caught by the spam filters by sending
the
message in plain text (i.e. no HTML), removing any attachments, and ensuring that
your messages are scanned for malware before dispatch and avoiding the use of
means of language that are in relation with our spam policy.

User spam

Inclusivecryptos.com provides an anti-spam system that enables users to send email
messages/private messages to others. Users must not use this facility to send
unsolicited, bulk or indiscriminate messages, whether or not for a commercial
